JENSEN HUGHES is a global leader in specialty engineering and consulting services for the built environment. We are a company of engineers, consultants, and scientists focused on evaluating risks and diligently developing the best, most cost-effective safety solutions. We offer extensive, practical experience through countless projects, research, and industry innovation.

Our global clients include a majority of Fortune 500 companies and cover the following sectors: corporate real estate, education, energy, government, healthcare, hospitality, industrial, military, and transportation.

With a deep understanding of the built environment, JENSEN HUGHES offers you a wide range of environmental consulting services to help manage your environmental risk. Our environmental services paired with our security consulting services allow us to offer a unique solution to your firm as often those issues are closely intertwined.

Our experts are engineers, meteorologists, and scientists who have worked in both the public and private sectors, allowing us to arm your firm with practical knowledge that will set you apart from competitors. Some of our experts have served as regulators, allowing us to have a broad perspective on environmental issues, which in turn is beneficial when representing your interests.

- Air Quality
 - Permitting
 - Modeling
 - Monitoring
- Environmental Impact Assessments
- Regulatory Analysis and Interpretation
- Litigation Support
- Materials and Process Assessment
 - Alternatives Identification and Evaluation
 - Chemical Risk Assessment
- Water Quality

No matter what the environmental issue, our goal is to partner with your team and help manage these environmental issues in a manner that is most conducive to the operation of your business.
